Coolbarz is a lightweight Windows application whose purpose is to help users place on their desktop customizable toolbars for easily accessing their preferred tools. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to create and customize your own screen toolbars on the breeze, without having to go through installation steps. Coolbarz gives you the possibility to add up to four toolbars on your desktop, which can be enabled and disabled, and tweaked in terms of position (left, top, right, bottom), border, maximum button width, pointer distance, as well as color. What's more, you can preview the toolbars, set their transparency, apply fading in or out effects, embed a new shortcut to the current toolbar by specifying the name, file, arguments, and other parameters. Other notable characteristics worth mentioning enable you to edit the shortcuts, delete the selected one or clear all of them with just one click, sort items by name, refresh the current information with just one click, as well as lock a toolbar's position on the screen. During our testing we have noticed that Coolbarz carries out a task quickly, and no errors showed up throughout the entire process. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not hampered. All things considered, Coolbarz proves to be a reliable application that bundles a handy set of parameters for helping you add toolbars on your screen. The intuitive interface and rich-featured set of customization tools make it an ideal tool for rookies and professionals alike.
