Start 3ds Max. Open the SDK Manager in the Revit plugin. Download the RPC plugin. Open a project in 3ds Max. Go to the Export tab in the 3ds Max interface. Select Render. Select the RPC option. Optionally, click on the "Advanced Options" button to select a preview or snapshot mode. In the lower-left hand corner of the 3ds Max window, click on the "Render" button. A small window should appear. Click on the "Render > Render to Viewport" button. Set the Output option to dgm. The "Rendering options" window should open. In the "Preview Model Path" option, click on the "Add Model Path" button and navigate to the ArchVision project you created in the previous step. Navigate to the "Architecture" folder. Open ArchVisionApp.exe. Select the "Open" option. Navigate to the 3ds Max and Revit project you just exported. Select the "Open". The models should open in ArchVision. Select the "Save as" option. Navigate to the ArchVision folder where you saved ArchVisionApp.exe. Save the project file as dgm. STEP 7 - OPENING THE 3DS MAX PROJECT When you open the 3ds Max project, the arch-viewer should be active. You can start typing in the arch-viewer and search for arch. When you click on the arch from the search results, the viewer should appear. Click on the "Controls" tab. Drag the "cam" icon from the "Controls" tab to the "Architecture" folder. Drag the "lamp" icon from the "Controls" tab to the "Architecture" folder. Drag the "points" icon from the "Controls" tab to the "Architecture" folder. Drag the "grid" icon from the "Controls" tab to the "Architecture" folder. Drag the "scale" icon from the "Controls" tab to the "Architecture" folder. Drag the "save" icon from the "Controls" tab to the "Architecture" folder. Drag the "camera" icon from the "Controls" tab to the "Architecture" folder. Drag the "arch-viewer" icon from the "Controls" tab to the "Architecture" folder. Drag the "ch" icon from the "Controls" tab to the 82157476af
